

# MANIFESTO

## Official Website

<https://www.teamtronics.org>

Languages: English, Chinese, Turkey, Philipino, Italian, Spanish, Polish, German, Portugees, France

## Company information

TEAM TRONICS, By the Community, For the Community

## Mission

Team Tronics will build an educated, interactive, inclusive community. An ecosystem where fellow Tronics will be rewarded for their participation in organized events and online learning.

## Vision

Team Tronics aim to accelerate its growth, distribute as much rewards as we can and become the most educative community with its own university. As community Super Representative we will enrich the lives of the community so that it will benefit the tron ecosystem.

## Company Location

The Netherlands

## Social Media Following

Our movement is very young and we are actively bringing in new members.

## **T.E.A.M - Together Everyone Archives More The support plan, it is all about giving back!**

**Team Tronics** thanks the community for their incredible support and would like to present our plan if we were to be elected as one of the Super Representatives.

First and foremost, we believe that for any plan to be effective the community must feel it has a voice. If elected it's our mission to build and maintain a platform that gives all members an equal voice. Every member of the Tronics community will have the ability to suggest, vote, and participate in Tronics supported projects. TRON has developed one of the industry's leading blockchain environments, and with that we feel it is our responsibility to build an ecosystem alongside this environment that facilitates a fluidity to its users greater than what has been seen before. It is our goal to become a liaison between the core technology within TRON's network and community driven efforts to expand on this technology helping both TRON and its technology flourish.

If voted to be Super Representative we would pledge to distribute the block reward, minus operational costs, as follows.

### **Community rewards**

'Team Tronics' pledges to allocate all rewards remaining after IT infrastructure costs and development fund contributions towards rewarding the community. We have deemed certain allocations to be priority for the growth of Tron and its technology moving forward. These deemed allocations are an overview and will be organically grown from the participation and feedback within the community. We believe in a single movement, unity in support and consensus of reward.

*Community members will be able to earn rewards by participating in activities set by the team.*

### **Education**

Education rewards can be earned by completing quizzes and reading articles about Tron, its partners and Blockchain as a whole. The token reward amount will be dictated by the complexity of the quiz and your score, or the level of the article you read.

The levels will be set at:

- (a) Novice
- (b) Competent
- (c) Expert

Tronics will launch the 'Tronics University' where members will learn and build on their knowledge of Tron's blockchain technology, by studying courses and degrees deemed crucial in the understanding and application of creating and expanding upon blockchain technology in general. The content included in the University will be made up from all aspect of 'Tron' and blockchain, and the TRON Foundation will have a direct level of input to this content.

Upon completion of these courses and Degrees, rewards will be allocated.

## **Code School**

Code School will be for the new and seasoned coders/techies amongst us, Team Tronics "Tech Team" will set tasks and objectives for members to follow and complete. The future of Tron needs to be passed on to people that have the skills, passion and determination to make it become the world community project it deserves to be.

Once coding modules have been finished, they must be submitted to the Tronics "Tech Team" for approval, if all is found to be correct, token rewards will be given out by the "Tech Team". The amount of the reward will be based on the complexity of the task or assignment, pre-determined at the beginning of the objective.

## **Social Events**

Social Events are eligible for a community reward if they are inclusive of all 'TRON' and Blockchain community members. Community members are welcome to submit an event to the team for consideration for a reward contribution. Examples of social events include but are not limited to;

- Team building events
- Developer meet ups
- Sporting events
- Educational seminars
- Trade fairs

To qualify the event must follow and adhere to predefined conditions

- The event must be advertised on the official Team Tronics media platforms and website.
- The event must include a recorded video of the event promoter giving a talk to the attendees.
- The event must promote Team Tronics and/or TRON.
- It must be inclusive to all people wishing to attend.

After the event the video will be added to the community page of the Team Tronics website, and will be posted on all social media platforms.

*Our goal is to make each event a memorable experience and leverage the power of TRON to grow our community.*

## **1,2,3 Initiative Program**

### **1. Study Group**

Study Groups are a chance for community members to join together and help each other with their studies. Rewards can be earned either as a group or as individuals.

Groups of more than 3 can earn rewards by showing Tronics that you have indeed worked together and progressed in your understanding of courses and technology associated with Tron and blockchain. At the end of a yet to be specified time, the group must hold a livestream with all group members included, giving a presentation of how they came to work together and how as a group they have grown in their understanding of Tron and Blockchain.

Individuals can earn rewards in the study group if they have shown to be exceptionally selfless with their time in helping other members of the group. After the groups live stream an anonymous vote will be presented to all group members, asking them to select the person for the individual reward, members within this group will not be able to vote for themselves.

*Commitment to helping others is at the core of what Team Tronics is trying achieve.*

### **2. Community Insight**

Community Insight will allow members to earn rewards by writing their own articles and submitting them to Tronics, these articles will be voted upon by the Tronics Team and any articles of merit will be posted to our media platforms. The Articles, Blogs or Vlogs do not have to focus exclusively on Tron but must represent at least one of the following:

1. Current understanding of either Tron or Blockchain.
2. How and why they found their way into crypto.
3. What they hope to achieve by being a part of the Tronics/Tron community.
4. Current social and/or economical positions they find themselves in because of existing world politics/governance.
5. Future life aspirations and why technology will be a part of it.

We believe that the future of TRON is in its community members and their growth in understanding of the ecosystem. Team Tronics will help all people who wish to increase their knowledge.

### **3. Idea Engine**

Idea Engine is a medium for members to present ideas for new content and information that the community would like added to any area of Team Tronics website, university, social media etc.

To participate community members must join the Team Tronics Telegram support group, they can then post their idea to the support group for feedback. If the idea gets significant support from the group, the idea/suggestion will then be put on all our media platforms to be voted on for a duration of 7 days. If the majority of the votes were 'Yes' then the team will pursue implementing the idea that has been deemed needed by the community. Tokens will be rewarded for every idea that gets approved through the voting procedure.

*Ideas shape the course of history, every great accomplishment of the human race started with an idea. We will achieve the unbelievable if we work as one.*

## **Contests**

Contests are intended to keep the community engaged and give them the chance to regularly compete for TRX.

An example would be *Photo of the Week*, Photo submittals just need to show what your interests are outside of TRON and blockchain. A balanced life is a full life. Although we are all involved-in and passionate about TRON, we still have time to admire, appreciate and enjoy the world around us.

Contest will be posted on the Team Tronics website, and added to the Team calendar.

## **DApp Project contribution**

To encourage the existing App creator community to move over to the Tron ecosystem, we will be running a yearly DApp project contribution fund.

1. Participants must already be active in their current field e.g. musicians, retailers, content creators, bloggers , app developers etc
2. They must show how they believe they will become a great asset to the TRON platform.
  - a. Applications to Team Tronics will run for 2 months, and the community will have different stages of voting. To win votes the applicants will have to make a first round presentation of the project, they can do this by any media that best suits them. After the presentation round, voting will be opened to the community to determine the top 5 projects.
  - b. The second round will be about engaging with the community. Applicants must show engagement with community events, explain how their project works and show its benefit within the Tron ecosystem. Voting will then take place to take our 5 projects down to 3.
  - c. The third round will be about making a demo of the DApp and showing real-world use of the project. Applicants will be able to ask for a level of help from the 'Team Tronics Technical Team', however, only in an implementation advisory role. All content must be designed by and created by the applicant. Once they have a demo, the projects will be presented to the community for the final vote.
  - d. The winner will receive the DApp Support contribution and promotion from 'Team Tronics' group across all of its media platforms.

*When the DApp is ready for release 'Team Tronics' will help assist in anyway the winner needs.*

## **‘#WeAreTron’ One Movement**

The power of social media is undeniable, most of us have met each other through these platforms, many new relationships are discovered when like-minded people come together and engage in conversations and debates. What we must all remember is that no matter what race, sexual orientation, religious beliefs, social standing, ethnicity, age or disability background, all members of our world community are invited to participate in our community activities.

Team Tronics believes in One Movement, the movement of the people, by the people for the people, and we will always do what we can to help the people of the world. Every financial quarter the team will ask the community to vote for a world relief charity and the remaining unallocated rewards will be donated to that charity to help with the vital and amazing work they do.

Team Tronics are driven to help community members fulfil their philanthropy, so we invite all Tronics supporters to send in the causes they wish to be involved in.

Philanthropy must be more than just a charitable donation. It is an effort we as individuals undertake based on an altruistic desire to improve human welfare. Team Tronics will allocate funds if the causes put forward fulfil the statement above.

#WeAreTron

## **Development Fund Contribution**

The TRON Foundation requires all Super Representatives to have the ability to scale their tech if needed, Team Tronics will create a fund that will facilitate us to fulfil TRONs expectation of plans for hardware and server improvements.

For the TRON ecosystem to become the world leader it deserves to be, it must have the most advanced hardware available and our development fund will keep us at the front of all improvements.

## **Community Support**

Team Tronics plans to be a decentralized, global organization operated by TRONICS from all over the world. TRONICS will be rewarded a TRX payment for their contributions towards supporting Team Tronics.

We believe in the immense importance of the TRON project. As team members we feel that if you are working on a project that you truly believe in, you will never see obstacles, only solutions and the vision that we are all aiming for will pull us to where we need to be.

‘Team Tronics’ is community built and driven, and all members should feel comfortable in communicating with us, regardless of how trivial or concerning, the Team will do whatever it can to help.

**Team Tronics thanks the community for taking their time to read our proposed community support plan and are humbled at the opportunity to represent the community as a potential Super Representative**

## **List of key staff and their photos**

Co-Founder and HR	Harry Warmerdam
Co Founder and Liason	Drew Wise
Head of IT	Scott Faunce
Head of Finance	Bryan Lambard
Head of Education & Adaption	Samuel Austin
Risk Management	James Nunes
Community manager	Kilroy Dillon
Campaign manager	Jason Cser

## Provide Background qualifications of key staff

**Harry Warmerdam**, Team leader and co-initiator of Team Tronics

Founder of Highway to HRM , previous worked for almost 20 years as an IT and security engineer. Studied at University of Leiden. I am a IT Specialist, entrepreneur and crypto junkie. A writer, proud father and husband.

**Drew Wise**, Team leader and co-initiator of Team Tronics

Entrepreneur, Business Oriented, with the mind-set to expand and grow any business. Knowledgeable on Blockchain technology with community building & Leadership qualities. Still in college, but self educated by listening to my peers & mentors. Direct liaison officer with Tron foundation

**Scott Faunce**, Team manager IT tech department

20+ years software engineer. Has experience in following: CAD design (chip and structural), software, web, networks, project management, automation in agriculture (controllers, Ai ), software architecture, database.

**Samuel Austin**, Team manager Education and Adoption

10+ years specialist AV installer and Project manager. Lutron Lighting certified installer. Specialist in large scale high end installations and service contracts. My duties include preparation, install, commissioning, service, educational material, instructing new employees. I am an avid Blockchain enthusiast and have interests in all things Tech.

**James Nunes**, Risk Manager,

Over 35 years in the Computer Industry, Founder and CEO of Magellan Networks, CEO of Columbus Networks, prior Dell Inc. Manager in Product Development, ISO and Regulatory Management. A computer enthusiast, entrepreneur, stock/crypto investing. Enjoys camping with family and friends, boating, snow skiing, scuba diving, biking and creating websites for family and friends.

**Justinas Kairys, Cybersecurity and Blockchain**

Founder and main developer "ibnz Developers". Bachelor's degree in Computer Science - University of East Anglia. Experienced IT Specialist. AI, Cybersecurity and Blockchain enthusiast.

**Kilroy Dillon, Community manager,**

Born and raised in the Philippines, Filipino-Scandanavian by blood. With Technical and Mechanical Skills. Can reassemble, reinstall, repair and customize computers and automotives like 4- wheeled cars, motorcycles and big bikes. Philippine Registered Nurse by Profession with the compassion and the heart to teach and to serve.

**Jason Cser, Campaign manager,**

Graduated college summa cum laude with a bachelor's degree in Justice & Public Safety. Received a honorable discharge after 7 years in the Army with a tour of duty to Iraq in 2005. Working in Federal Law Enforcement since 2008. Over the years coordinated various teams and events. These include college events, military operations as a team leader, active member of a labor union, and as a Veterans advocate.

**Initial server configuration:**

AWS X1.16xlarge - 64 Core CPU - 1 TB RAM - 1.9 TB SSD (EBS) - 25 GB Broadband,  
Public IP: 34.217.9.219  
Port Open: 50051

**Current Location:**

United States and China

**Testable Node:**

May 7th, 2018

**Future Locations:**

France  
United Kingdom

## **Deployment:**

The system is a high availability and multiple site for disaster recovery protection programs to ensure the continuity of business, while avoiding the destruction of the system by regional disasters. The selection of the server location is for the USA and China to begin and then expand full nodes into France, the UK and multi-regional locations with further nodes. After the operation is stable, considering the service quality and performance latitude, dynamic and smooth expansion will be implemented.

## **Software:**

Improve supporting services. Provide stable connection node service platform based on Kubernetes and Docker distributed cluster to automate contraction and expansion.

## **Expansion:**

1 - The Storage will be migrated to AWS cloud storage service S3 and expand to 20-50 TB. Will consider using AWS's Glacier archiving service to store data hierarchically according to the data time dimension.

2 - Two Full Nodes. First Full Node running on AWS alongside Witness node, the second Full node running on Alibaba Cloud. This second Full node gives us failover capabilities, geographical and political separation.

## **Budget:**

Budget Expenditure and Technical Plan before June 26, 2018.

Percentages are of daily block rewards earned.

80%—Education & rewards program

10%—Nodes

10%—Other Operating Expenses
